

# CURRICULUM VITAE

## Maxime van der Heijden

m.v.d.heijden@tue.nl – maxime.v.d.heijden@hotmail.com  
+31 657 370 089  
Hulterbussel 34, 5581 SE Waalre, The Netherlands

*I aim to become a leader in the science and engineering of electrochemical energy technologies, which is key for the energy transition. I aspire to perform impactful research and to mentor young scientists to achieve their full potential and tackle important societal problems*

### Education

---

- Nov. 2019 – Dec. 2023 **PhD Candidate Chemical Engineering and Chemistry**  
Eindhoven University of Technology  
Research group: Electrochemical Materials and Systems & Membrane Materials and Processes  
Subject: *Engineering porous electrodes for redox flow batteries – modeling, manufacturing, and diagnostics*
- Developed a pore network model for porous electrodes
  - Coupled a genetic algorithm and pore network model for bottom-up design of porous electrodes
  - Manufactured stereolithography 3D printed and carbonized porous structures
  - Conceptualized operando and ex-situ imaging diagnostics for electrodes using neutron radiography and X-ray tomography
  - Performed electrochemical diagnostics and characterization experiments
- Sept. 2017 – Aug. 2019 **Master Molecular Systems and Materials Chemistry, MSc.**  
Eindhoven University of Technology  
Research group: Stimuli-responsive Functional Materials and Devices  
Subject: *Multi dye coordination in layered smectics for luminescent solar concentrator applications*  
Average grade: 8.5, Thesis: 8.
- Sept. 2014 – Jul. 2017 **Bachelor Chemical Engineering and Chemistry, BSc.**  
Eindhoven University of Technology  
Research group: Stimuli-responsive Functional Materials and Devices  
Subject: *Complex patterning of Luminescent Solar Concentrators for Improved Aesthetics*  
Distinction: With Great Appreciation, Average grade: 7.5, Thesis: 8.
- Sept. 2008 – Jun. 2014 **VWO profile Nature & Health and Nature & Technology**  
Van Maerlant Lyceum, Eindhoven

### Work experience

---

- Dec. 2023 – present **PostDoctoral Researcher Chemical Engineering and Chemistry**  
Eindhoven University of Technology  
Research group: Electrochemical Materials and Systems
- May 2019 – Aug. 2019 **Graduation Internship**  
DSM Coating Resins, Department Printing & Packaging, Waalwijk  
Subject: *Receptive coatings for inkjet formulations*. Grade: 9
- Aug. 2016 – Feb. 2019 **Student-assistant, Euflex employment services**  
Eindhoven University of Technology, Department of Chemical Engineering and Chemistry

- **Tutor design-based learning nanotechnology** (Oct. 2018 – Feb. 2019)  
Supervising meetings of first-year students
- **Mentor VWO workweek** (Aug. 2018)  
Supervising VWO students on a chemistry related project
- **Studentmentor** (Aug. 2016 – Jul. 2018)  
Supervising first-year students, the Study-Choice, and Check-your-match days

Dec. 2014 – Jul. 2016

#### **Tutoring LOOT-students**

Sint-Joriscollege, Eindhoven

Tutoring (mathematics/chemistry/physics) students who participate in topsport

### Peer-review publications

M. van der Heijden, M. Kroese, Z. Borneman, A. Forner-Cuenca (2023), Investigating mass transfer relationships in stereolithography 3D printed electrodes for redox flow batteries, *Advanced Materials Technologies*, **8**, 18, 2300611. <https://onlinelibrary.wiley.com/doi/full/10.1002/admt.202300611>

Forner-Cuenca, Unravelling Concentration Profiles in Redox Flow Batteries Using Neutron Radiography (2023), *ChemRxiv*. <https://chemrxiv.org/engage/chemrxiv/article-details/64e77958dd1a73847f6d8c15>

## Submitted

E.B. Boz, M. van der Heijden, R.R. Jacquemond, P. Boillat, J. Hjelm, A. Forner-Cuenca, Correlating electrolyte infiltration with accessible surface area in microporous electrodes using neutron radiography.

\*Co-first authors

## Peer-review

---

May 2023	<b>IOP Peer Review Excellence certificate</b>
May 2023 – present	<b>Peer review for the following Journals:</b> <ul style="list-style-type: none"><li>• Joule</li><li>• ACS Applied Energy Materials</li><li>• Current Opinion in Electrochemistry</li></ul>

## Presentations

---

M. van der Heijden, Marit Kroese, Jacky Olinga, Zandrie Borneman, Antoni Forner-Cuenca, Stereolithography 3D Printing As a Versatile Tool to Manufacture Porous Electrodes for Redox Flow Batteries, Oral presentation at the 244th Electrochemical Society Meeting, Gothenburg, Sweden, 2023.

M. van der Heijden, R. van Gorp, G. Szendrei, V. de Haas, M.A. Sadeghi, J. Gostick, A. Forner-Cuenca, Starting from the Bottom: Coupling a Genetic Algorithm and a Pore Network Model for Porous Electrode Design, In-person invited lecture at Columbia University, New York, US, 2023.

M. van der Heijden, R. van Gorp, G. Szendrei, V. de Haas, M.A. Sadeghi, J. Gostick, A. Forner-Cuenca, Starting from the Bottom: Coupling a Genetic Algorithm and a Pore Network Model for Porous Electrode Design, Oral presentation at the 243rd Electrochemical Society Meeting, Boston, US, 2023.

M. van der Heijden, R. van Gorp, G. Szendrei, V. de Haas, M.A. Sadeghi, J. Gostick, A. Forner-Cuenca, Starting from the bottom: Coupling a genetic algorithm and a pore network model for porous electrode optimization, Oral presentation at the 15<sup>th</sup> Annual InterPore Meeting, Edinburgh, Scotland, 2023.

M. van der Heijden, R. van Gorp, G. Szendrei, V. de Haas, M.A. Sadeghi, J. Gostick, A. Forner-Cuenca, Coupling a genetic algorithm and a pore network model for redox flow battery porous electrode optimization, Oral presentation at the 19<sup>th</sup> ModVal Symposium, Duisburg, Germany, 2023.

M. van der Heijden, R. van Gorp, G. Szendrei, M.A. Sadeghi, J. Gostick, A. Forner-Cuenca, Towards bottom-up design of porous electrode microstructures – An approach coupling evolutionary algorithms and pore network modeling, Oral presentation at the 241st Electrochemical Society Meeting, Vancouver, Canada, 2022.

M. van der Heijden, R. van Gorp, G. Szendrei, M.A. Sadeghi, J. Gostick, A. Forner-Cuenca, Towards bottom-up design of porous electrode microstructures – coupling evolutionary algorithms and pore network modelling, Oral presentation at the 17<sup>th</sup> Netherlands Process technology Symposium, Delft, The Netherlands, 2022.

M. van der Heijden, R. van Gorp, G. Szendrei, A. Borneman, A. Forner-Cuenca, Towards bottom-up design of porous electrode microstructures for redox flow batteries, Oral invited presentation at the Porous Media Tea Time Talks, Online, Session 20, YouTube, 2021.

M. van der Heijden, R. van Gorp, G. Szendrei, M.A. Sadeghi, J. Gostick, Z. Borneman, A. Forner-Cuenca, Towards bottom-up design of porous electrode microstructures - coupling genetic algorithms with pore network modeling of redox flow battery electrodes, Poster and recorded oral presentation at the 13<sup>th</sup> Annual InterPore Meeting, Online, 2021. **Awarded with the MDPI energies students poster award out of the 104 posters.**

M. van der Heijden, R. van Gorp, G. Szendrei, Z. Borneman, A. Forner-Cuenca, Optimizing the 3D Microstructure of Redox Flow Battery Electrodes, Poster and recorded pitch at CHAINS 2020, Online, 2020.

M. van der Heijden, M. Kroese, Z. Borneman, A. Forner-Cuenca, Investigating Mass Transfer Relationships in Stereolithography-Based 3D Printed Electrodes for Redox Flow Batteries, Poster presentation at the 243rd Electrochemical Society Meeting, Boston, US, 2023.

M. van der Heijden, M. Kroese, Z. Borneman, A. Forner-Cuenca, Investigating mass transfer relationships in stereolithography 3D printed electrodes for redox flow batteries, Poster presentation at the 15<sup>th</sup> Annual InterPore Meeting, Edinburgh, Scotland, 2023.

M. van der Heijden, Z. Borneman, A. Forner-Cuenca, Optimizing the 3D microstructure of redox flow battery electrodes, Poster presentation at the 2020 Membrane Symposium, Essen, 2020.

R.R. Jacquemond\*, M. van der Heijden\*, Z. Borneman, D.C. Nijmeijer, A. Forner-Cuenca, Towards Bottom-up Engineered Electrodes for Redox Flow Batteries, Poster presentation at the 1<sup>st</sup> ECCM graduate school, Eerbeek, 2019.

## Teaching and supervision during PhD

---

Feb. 2020 – Jul. 2022	<b>Teaching assistant Separation Technology</b> , Bachelor course, 3 semesters Preparation and lecturing the guided self-studies, construction of the answer sheets for the exercises, group assignments and exams, and correction of the group assignments and exams.
Nov. 2019 - present	<b>Supervision of Master/HBO students</b> <ul style="list-style-type: none"><li>• <b>Rik van Gorp</b> (2019-2020), Master student. <i>Exploring the role of the porous electrode microstructure in redox flow battery performance</i></li><li>• <b>Gabor Szendrei</b> (2020-2021), Master student. <i>Topology optimization of porous electrodes for redox flow batteries</i></li><li>• <b>Nard Schellekens</b> (2021), HBO student. <i>Exploring the role of porosity gradients in redox flow battery electrodes</i></li><li>• <b>Marit Kroese</b> (2021-2022), Master student. <i>3D-printing of optimized electrode microstructures for organic redox flow batteries</i></li><li>• <b>Victor de Haas</b> (2022-2023), Master student. <i>Topology optimization to co-design flow fields and porous electrodes for redox flow batteries</i></li><li>• <b>Jacky Olinga</b> (2022-present), Master student. <i>Visualization of reactive mass transfer in redox flow batteries using confocal microscopy</i></li></ul>

## Awards and grants

---

Sept. 2017 – Sept. 2019	<b>Topsector Chemistry Scholarship</b> , VNCI, DSM Two-year student grant for excellent master students in Chemistry, sponsored by DSM. The award is given by companies to talented and motivated MSc Chemistry and Chemical Engineering students in the Netherlands.
Jun. 2021	<b>MDPI Energies Student Poster Award</b> , InterPore2021 Poster title: <i>Towards bottom-up design of porous electrode microstructures – coupling genetic algorithms with pore network modeling of redox flow battery electrodes</i> This award is given in recognition of outstanding student poster presentations at the annual InterPore conference.
Mar. 2021	<b>Travel Grant Battery Division</b> , ECS Boston 2023 Presentation title: <i>Starting from the Bottom: Coupling a Genetic Algorithm and a Pore Network Model for Porous Electrode Design</i> This award is given in recognition of promising students in the science and engineering areas of electrochemical energy storage and conversion.

## Extracurricular activities

---

Sept. 2017 – Sept. 2019	<b>Topsector Chemistry Scholarship committees</b> , VNCI
Aug. 2018 – Sept. 2019	Organization and Development
Sept. 2017 – Aug. 2018	Social Activities and Personal Development
Dec. 2017 – Dec. 2018	<b>Chairman Symposium committee</b> , study association T.S.V. ‘Jan Pieter Minckelers’ In collaboration with Octave Levenspiel (PDEng trainees). Subject: <i>Sustainability in Chemical Industry: challenges and solutions</i>

## Skills and Techniques

---

<b>Languages</b>	Dutch (native), English (fluent) and German (basic)
<b>Simulations</b>	Pore network modeling, Genetic optimization, Python (Sypder, Jupyter notebook), MATLAB
<b>Characterization</b>	X-ray tomography, Neutron radiography, Electrochemical measurements, SEM, EDX, TGA, FTIR, UV/VIS/NIR spectrophotometry, POM, Surface profilometry, FRET measurements, Edge-emission measurements, Adhesion tests, Viscosity measurements
<b>Manufacturing</b>	3D SLA printing, Coating of porous materials, Carbonization, Inkjet printing, Spray-coating, Photopolymerization, Liquid crystal films, Coating formulation,
<b>Other software</b>	Origin, AUTOCAD, ChemDraw, Paraview, Geodict, FormLabs
